¹ An Internet subscriber is defined as a fixed service that has been installed and is operational at the customer premise, which includes dwelling units (households) or businesses.

² On January 1, 2026, Bell updated its Internet subscriber metrics to include wholesale subscribers. As a result, previously reported subscribers at the end of Q4 2025 have been restated for comparability.

³ In Q1 2026, Bell removed 181,086 Virgin Plus Internet subscribers, as it stopped selling new plans for this service in Ontario as of January 14, 2026.

⁴ Sasktel reports on a fiscal calendar beginning April 1, ending March 31

⁵ SaskTel omitted its consolidated broadband connections metric (which includes connections for fibre, DSL, and legacy copper) from its 2025-26 Annual Report; specific metrics for Q1 2026 (SaskTel's fiscal Q4) are unavailable. To maintain sheet totals, total subscribers for Q1 2026 and the year were calculated using SaskTel's total subscribers at the end Q4 2025.

⁶ In January 2026, Telus removed 30,000 Internet subscribers from its base.

⁷ Cogeco reports on a fiscal calendar beginning September 1, ending February 28.

⁸ Videotron did not report Net Additions for Q1 2026. As a result, net additions have been calculated by the Association

⁹ Due to SaskTel omitting its consolidated broadband connections metric from the 2025-26 Annual Report, the carrier's data is excluded from Q1 2026 and the full-year net additions calculations.
